INDEPENDENT CERTIFICATION OF DIAMONDS & GEMSTONES

ANCHORCERT CERTIFICATION IS PROVIDED BY A TEAM OF HIGHLY QUALIFIED GEMMOLOGISTS WHO COMBINE THEIR EXPERTISE WITH STATE OF THE ART EQUIPMENT TO PROVIDE FAIR AND ACCURATE REPORTS.

AnchorCert diamond and gemstone reports are available in a number of formats to meet differing requirements. As well as providing reassurance to buyers, AnchorCert reports add value to each precious stone and provide retailers and dealers with an invaluable sales aid.

Reports available from AnchorCert include:

FULL REPORT A4 WITH FACET DIAGRAM

A comprehensive report suitable for loose (unmounted) coloured and colourless diamonds providing detailed information on all facets of the stone including measurements, weight, shape, colour, clarity, cut grade, symmetry, fluorescence, girdle and a facet diagram.

A Full Report (A5) without facet diagram and reports for Laboratory Grown Diamonds are also available.

GEMSTONE AND PEARL FULL REPORTS

Gemstone and Pearl reports provide an independent authentication of the stone or pearl. Any treatments are identified and documented. All AnchorCert full and short reports carry the unique anchor hologram to prevent forgery and copying.

MINI REPORTS - DIAMONDS AND TANZANITES

Suitable for loose and mounted stones and multi set jewellery, the Mini Report presents important quality information including weight, shape, cut, measurement, clarity and colour in a simple format. The Mini Report is also available for Tanzanites using the unique grading system developed by AnchorCert.

Standard Mini Report

MINI MAX

For those who are seeking a more contemporary and informative presentation, the Mini Max product adds authority to the Mini Report. Packaged in a protective satin finish wallet, it includes full details of the grading system used, a consumer orientated glossy brochure and a grading card all presented in an attractive credit card format.

Mini Max Report

LASER INSCRIPTION

AnchorCert also offers a Laser Inscription service for diamonds and coloured gemstones.
